

Project Name: Dots and Box

Course Name: Software Development

Programming Language: Java

10-Week Working Schedule (Dots and Box Project)

Week 1:

- **Work:** Project idea finalize, rules of Dots and Boxes game analyze, basic planning.
- **Learning:** Java basics (variables, loops, conditions).
- **GitHub Upload:** Project description (README), initial setup files.

Week 2:

- **Work:** Game structure design (grid, dots, lines concept).
- **Learning:** Java arrays and 2D arrays.
- **GitHub Upload:** Basic grid structure code.

Week 3:

- **Work:** User input system (taking moves from player).
- **Learning:** Scanner class, input handling.
- **GitHub Upload:** Input system implementation.

Week 4:

- **Work:** Draw lines between dots (horizontal & vertical).
- **Learning:** Methods/functions in Java.
- **GitHub Upload:** Line drawing feature code.

Week 5:

- **Work:** Box completion detection logic.
- **Learning:** Conditional logic (if-else, nested conditions).
- **GitHub Upload:** Box detection algorithm.

Week 6:

- **Work:** Score system (player points counting).
- **Learning:** Variables tracking and simple logic building.
- **GitHub Upload:** Score tracking feature.

Week 7:

- **Work:** Turn system (switch between players).
- **Learning:** Control flow and game loop concept.
- **GitHub Upload:** Turn-based gameplay code.

Week 8:

- **Work:** Game end condition (who wins).
- **Learning:** Loop control and final condition checks.
- **GitHub Upload:** Game completion logic.

Week 9:

- **Work:** Improve UI (console output clean and readable).
- **Learning:** Formatting output in Java (System.out).
- **GitHub Upload:** Improved UI version.

Week 10:

- **Work:** Final testing, bug fixing, and polishing.

- **Learning:** Debugging and code optimization basics.
- **GitHub Upload:** Final complete project with README and screenshots.

Conclusion

This 10-week plan ensures step-by-step development of the Dots and Boxes game using Java. Each week focuses on specific development tasks, required learning topics, and proper GitHub updates to track progress professionally.
